

Rectangular Diaper Pattern

Fabric:

Jersey knit or flannel fabric. Something soft and absorbent. You can use large t-shirts as long as there is no printing on them and they are in good condition.

Instructions:

- Cut 2 - 13" x 16" rectangles making sure the stretch of the fabric is long ways (on the 16" side)
- Cut 3 - 16" x 4" rectangles for the center padding

Stack the two 13" x 16" rectangles right sides out and serge or zigzag around all of the edges.

Stack the 3 rectangle pads together and straight stitch around the edges to keep them together.

Next center the pads on the large rectangles and zigzag around the edges.
