

## **Regular Bib**

There are 3 pcs to this bib:

First, the barrier (pul, plastic, or rubber)

This piece should be on bottom.

Second is the back of the burp cloth.

This piece (I use flannel) should be in the middle.

The third is the top which will be the front.

It can be whatever fabric you choose.

Stack the pcs in the above order with the front pc facing down.

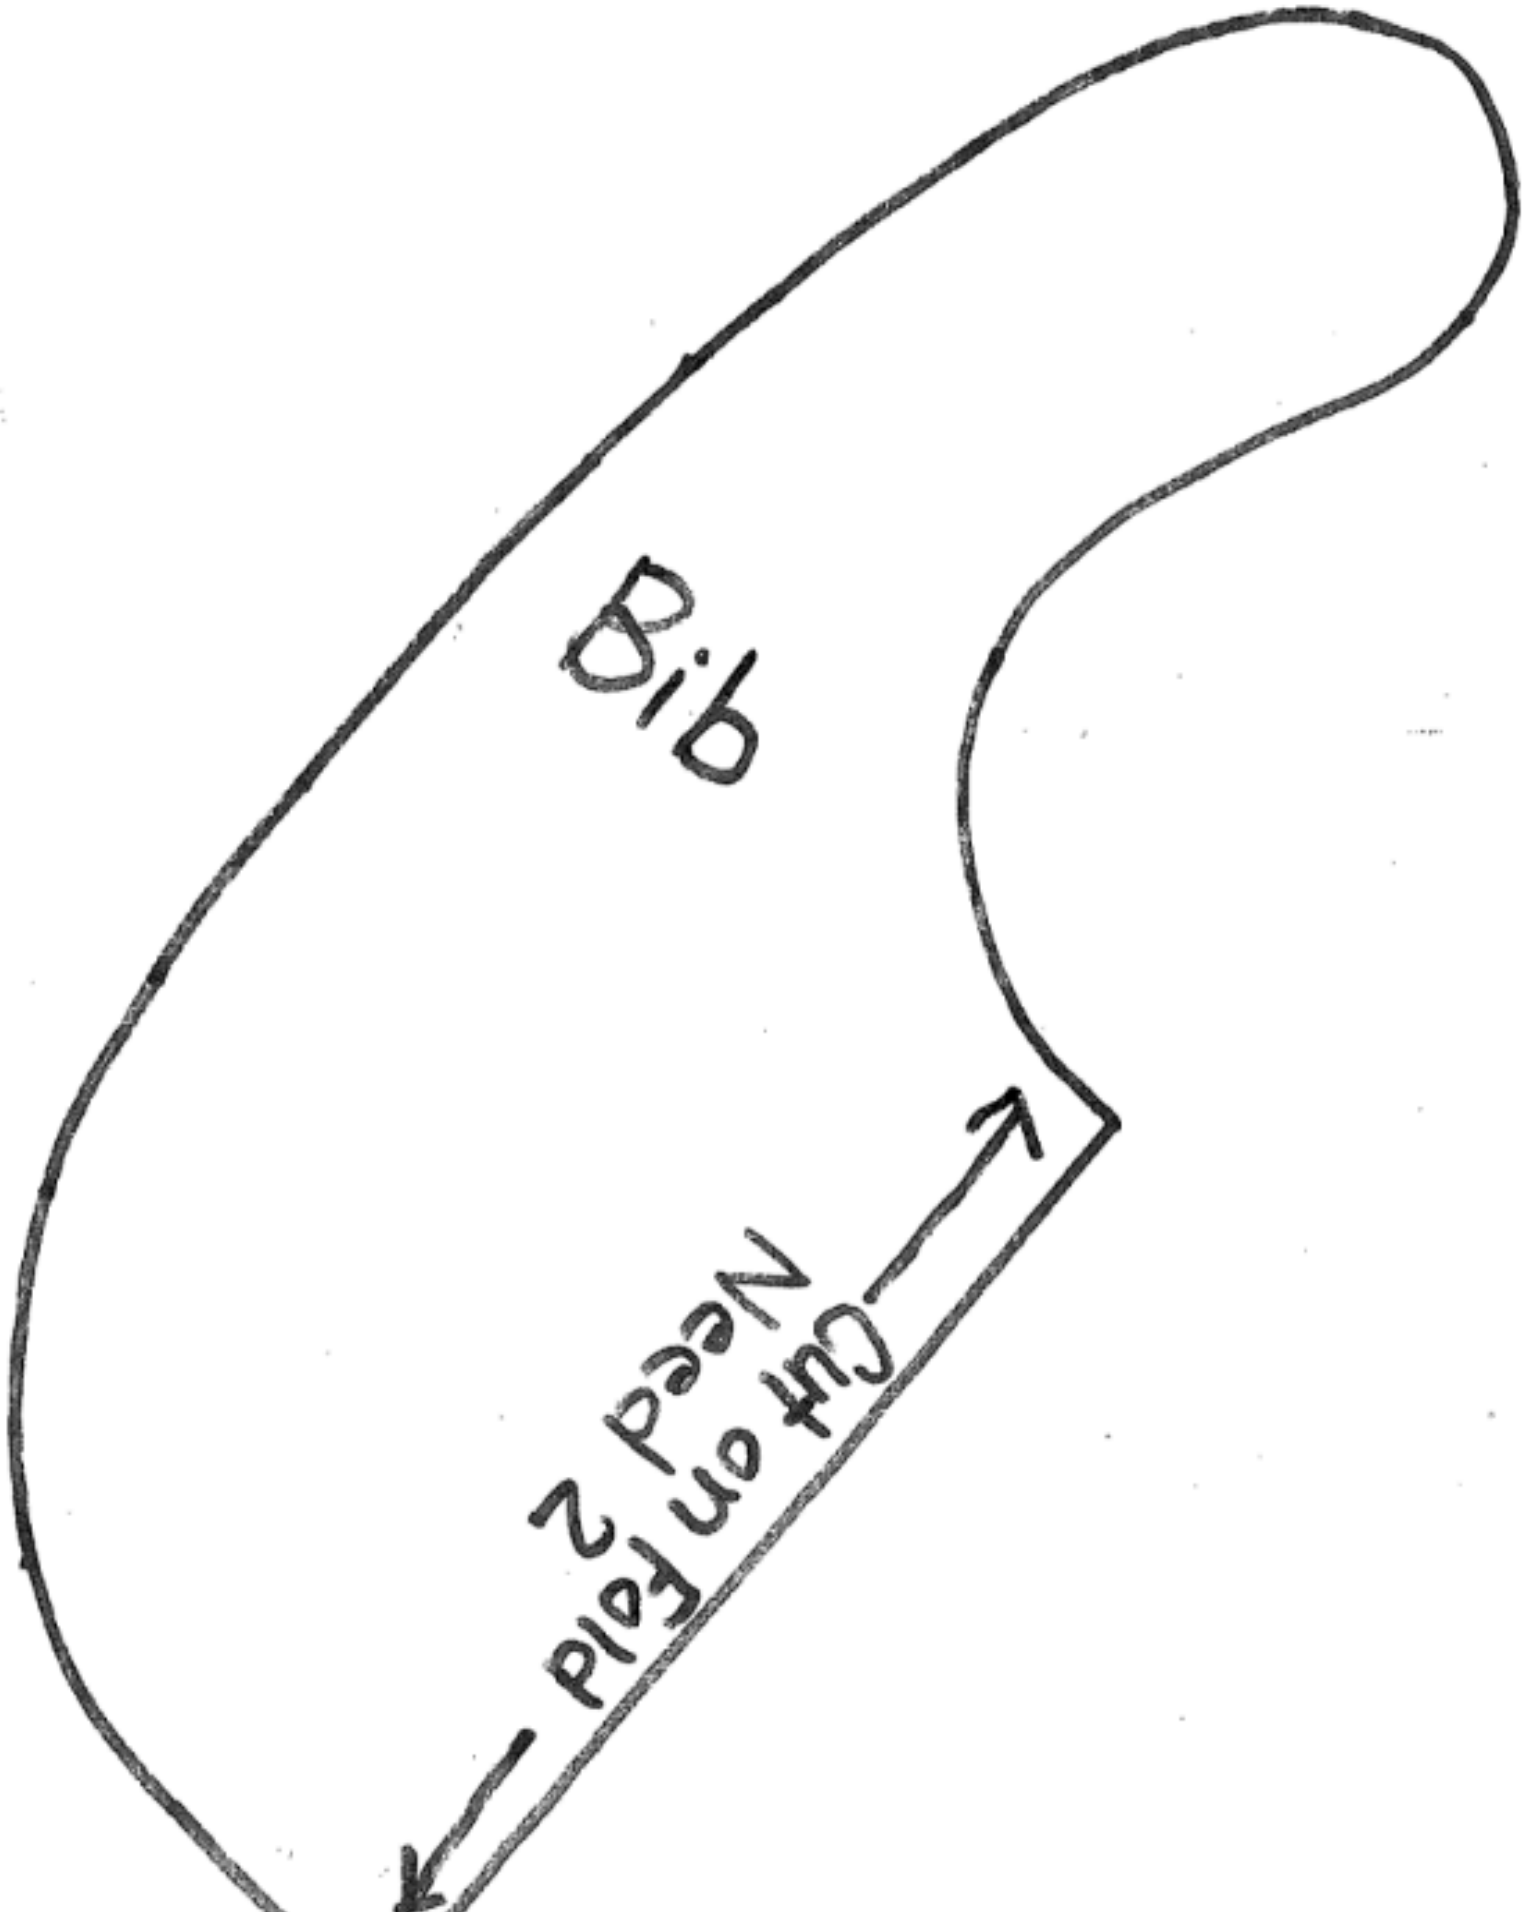

Pin them together and stitch but leave a slit in the side.

Trim close to the stitching.

Turn right side out between the flannel and the top piece.

Topstitch all around, stitching closed the opening.

Add Velcro, a snap, or a button at the back tabs for the closure.
