

Ready to walk?

Walk4Water is a fundraising event supporting the mission of HHI to bring clean water to those in need by drilling and maintaining water wells. By eliminating water-borne diseases, long walks to limited water sources, and drought-affected gardens, families are able to dedicate more time and energy to business, education, and hygiene.

How can you help the water crisis?

1. By walking together, you raise awareness to the crisis.
2. By praying for these communities, you get a window into seeing God move, between the local and international church.
3. By donating, you get to play a tangible part in giving hundreds of people access to clean water.
